Vacuum and Compressed Air Specialists for the Woodworking Industry

CNC Routing • Laminating/Veneering • Milling • Compressed Air

Combined Fluid Products Company

Application Expertise

Since 1975, CFP has built a solid reputation for solving problems and improving efficiencies in the woodworking industry. We are known as the woodworking industry's Vacuum and Compressed Air Specialist. Along with superior product offerings and excellent service, it is our application expertise that sets us apart.

Rotary Screw Vacuum Pumps & Compressors

- Oil-sealed rotary screw vacuum pumps with VSD and fixed speed controls. Flow rates to 3000 CFM. Vacuum to 29.9" Hg.
- Oil-free and oil-sealed rotary screw compressors with VSD and fixed speed controls. Pressure up to 175 PSI.
- Feature-rich, quiet, and highly efficient.

Oil-Sealed Liquid Ring Vacuum Pumps

- Rugged, heavy-duty design has long maintenance intervals.
- Air-cooled, oil-sealed design requires no seal water.
- Large clearances and a non-contacting impeller take abuse without damage.
- Flow rates from 20 to 5000+ CFM.
- Vacuum to 29" Hg.
- The only system with a standard 3-year warranty.

Oil-Sealed Rotary Vane Vacuum Pumps & Systems

- Oil-sealed rotary vane vacuum pumps are a dependable choice when continuous high vacuum levels are required.
- Performance from 2 to 710 CFM (0.2 HP to 50 HP).
- Vacuum to 29.9" Hg.
- Standard and custom designed systems in simplex, duplex, and multiplex arrangements.

Vanes for Oil-less Pumps

For over two decades, CFP has been proudly manufacturing DuraVane™ – a high-quality and high performance vane used in a wide variety of rotary vane pump brands. Each vane is precision-machined to exacting tolerances and is made of specially formulated carbon-graphite composites and binders to extend pump performance and life.

DuraVane vanes are made in America, fully guaranteed, and are priced up to 37% less than OEM pump manufacturer vanes. They are engineered as an exact replacement to offer both great value and performance.

Top-Performance Filters

At CFP, we recognize that proper filtration is crucial for obtaining the optimum performance and reliability you need from your equipment. We offer and stock a wide range of top quality filters for air, oil, hydraulic, coolant, and other filtration applications at highly competitive prices.

Let our filter experts assist you! We can recommend a filter that will stand up to your most demanding equipment challenges – saving you money and positively affecting your overall maintenance costs.

Reliable, Quality Replacement Parts

Whether you need a single part or a complete service kit, call CFP to keep your equipment operating properly, safely, and efficiently. The parts we have in our portfolio meet the rigorous standards of the most dependable manufacturers to achieve optimum performance and meet today's high demands on your equipment.

Premium Synthetic Lubricants

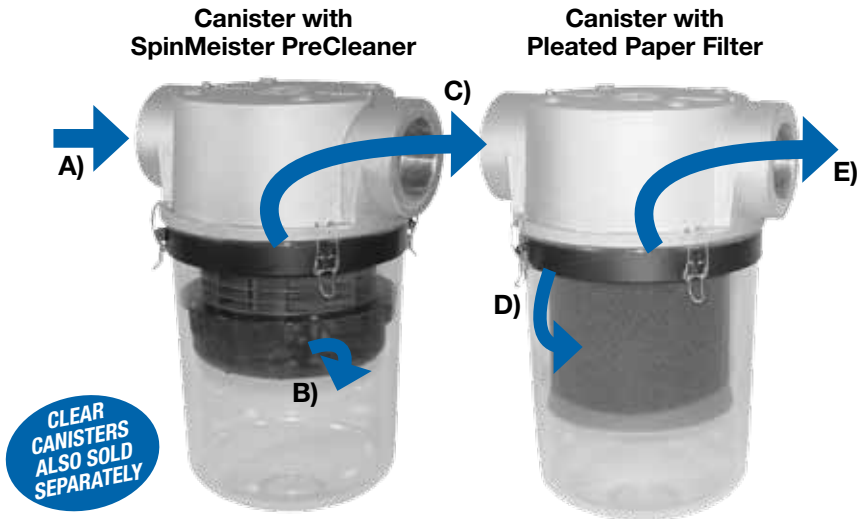

Using the proper oil can reduce maintenance costs, change intervals, and energy costs. Our Accolade™ brand of synthetic lubricants offers superior protection for your valuable equipment while reducing costs, safety risks, and environmental impact.

SpinMeister™ Precleaner

High Dust Environments Need Extreme Filtration – Protect Your Investment

- Prevent large debris from entering the air stream
- Significantly increase the life of a filter element
- Simplify maintenance with visual inspections

Never shut down a system to check filters again. The SpinMeister Precleaner features a clear canister that is ideal for quick visual filter inspections. The large dirt holding capacity will maximize maintenance routines, and the easy clip release system ensures fast changes. The canister is made of polycarbonate material to withstand impacts and fractures at high vacuum levels. The SpinMeister can be quickly added to most systems.

The SpinMeister is 85+% efficient up to 15 microns. Choose from two Precleaner options: polished aluminum, which includes a limited lifetime warranty, or molded fiber-filled composite with a low pressure drop design.

What our customers say about us...

“CFP is very knowledgeable on their products and is willing to educate their customers. They are very flexible on scheduling and have exceptional, one-on-one customer service.” – Sales Director

“I know it has been awhile, but I just wanted to touch base and let you know how well everything worked out. You were 100% correct. I had to throttle this thing back quite bit to be honest. I have to say that it is just perfect!” – Plant Manager

“I love working with companies on top of things. CFP has a group of ladies that surely are. Thank you so much.” – Purchasing Agent

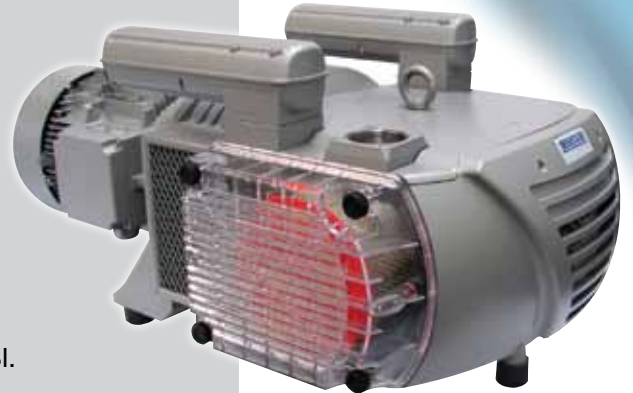

The Finest Products Available

We offer a comprehensive line of Vacuum Pumps, Air Compressors, Blowers, Air Knives, Filters, Lubricants, and Systems at competitive prices. We stock a large inventory of OEM and replacement parts and maintenance items with specially discounted prices on filters, vanes, and lubricants.

Oil-Less Rotary Vane Vacuum Pumps & Compressors

- Completely oil-less design for applications that cannot tolerate possible contamination.
- Available in vacuum only, pressure only, and vacuum-pressure configurations.
- Flow rates from 2.8 to 353 CFM.
- Vacuum pumps are suitable for continuous operation from atmospheric pressure up to 27" Hg.
- Compressors are suitable for continuous operation up to 25 PSI.

Oil-Free Rotary Claw Pumps

- High-efficiency, oil-free performance with low operating costs and maintenance.
- Available in vacuum only, pressure only, and vacuum-pressure configurations.
- Flow rates from 43 to 671 CFM.
- Vacuum pumps are suitable for continuous operation from atmospheric pressure up to 27" Hg.
- Compressors are suitable for continuous operation up to 32 PSI.

Regenerative Blowers

- Single-stage, two-stage, and three-stage regenerative blowers up to 776 CFM (35 HP).
- High pressure and vacuum capability ideal for conveying and drying.
- Robust design with fully supported outboard blower bearings.
- TEFC and Explosion Proof motors.
- Fully-assembled packages with filters, relief valves, and enclosures are available.
